

St. Andrew's Episcopal School
Middle School Distance Learning Plan

The goal of the St. Andrew's distance learning plan is to provide students with the academic, social-emotional, physical, and enriched experiences they would receive if they attended school in person. Students will be more successful with a distance learning format if teachers, students, and parents work together. Please know that our faculty and staff are here for you to ensure the best for your child during this time.

Teachers will Provide the following:

Daily Morning Meeting Time:

Advisors will meet virtually with their homeroom students to start each day at 9 AM. This time will be spent taking attendance, building community, and helping the students understand their schedule for the day.

Daily Lesson Plans:

SAES Middle School teachers will provide daily lesson plans that include clear learning objectives, instructional videos, and resources for students and parents. The daily lesson plan will be communicated to the students at the beginning of each class via a virtual class meeting. Attendance will be taken at the beginning of each class. Teachers will use this hour to teach virtually (whole group and/or small group) and provide lessons that students can complete on their own. The small group discussions provide valuable facetime, give students space for Q&A (more individualized instruction), and allow for more collaboration and connection with classmates. Teachers will provide a high level of detail for all learning experiences. The teacher will be available to those students throughout the allotted hour.
