Mathematics

In 4th grade, we use the Math in Focus program that offers an engaging and interactive approach to covering 4th grade math content. The students use a student interactive book so students record their strategies, explanations, solutions, practice and test prep right in their books. Students all complete many group activities to reinforce the skills taught.

The concepts learned includes:

Place value

Multiplication and division

Operations and algebraic thinking

Fractions, measurement, and data

Geometry

Science

The science program, is a hands-on interactive program.

The students engage in small group and in depth investigations that cover a variety of topics including:

Life Sciences - Plants and Animals

Survival, growth, protection, and reproduction

Digestions, circulation, support, movement, and protection

Sense receptors for touch, sound, smell, taste, and light

Earth Sciences –

Energy, Earth's Changing Surface, and Waves

Energy transfer by collision, sound, light, and heat.

Electric currents

Energy resources - natural resources, renewable resources, and nonrenewable resources

Deposition, erosion, and weathering

Water as rain, rivers, glaciers, and ice

Fossils, volcanoes, earthquakes, mountains and natural hazards

Properties of waves - amplitude, wavelength, and frequency

Creation and effect of waves

Language Arts

Writing

Weekly Journal Writing

Narrative Writing

Opinion Writing
